

Functional Requirements Document (FRD) Template

Reference Template for Document Validation System

1. Introduction

1.1 Purpose

Describe the purpose of this Functional Requirements Document (FRD). Mention the system name and explain what functional behaviour this document is intended to define.

1.2 Scope

Describe the scope of the functional requirements. Explain which features and functions are included and what is not covered by this document.

1.3 Definitions, Acronyms, and Abbreviations

List important terms, acronyms, and abbreviations used in the document.

Term	Description
FRD	Functional Requirements Document
User	Person who interacts with the system
Function	A specific capability or behaviour the system must perform

1.4 References

List any documents, standards, or resources referred to when preparing this FRD, such as the BRD, SRS, or project guidelines.

1.5 Document Overview

Briefly explain how the rest of the document is organized.

2. Functional Overview

2.1 System Functions

List the main functions of the system.

- User registration and login
- Document upload and processing
- Data validation and verification
- Report generation and export
- Admin management

2.2 User Classes and Characteristics

Describe the different types of users who will use the system.

- Admin
- Registered User
- Guest User

2.3 Operating Environment

Describe the hardware, software, browser, operating system, or network environment required to run the system.

3. Functional Requirements

3.1 Detailed Functional Requirements

Describe each function the system must perform, with a unique identifier and priority.

Requirement ID	Description	Priority
FR-01	The system shall allow users to register using a valid email and password.	High
FR-02	The system shall validate user credentials during login.	High
FR-03	The system shall allow users to upload documents in PDF and DOCX formats.	High
FR-04	The system shall extract text and structure from uploaded documents.	High
FR-05	The system shall compare documents against the selected reference template.	High
FR-06	The system shall generate a validation result with structure score and status.	Medium
FR-07	The system shall allow admins to add, update, or remove templates.	Medium

4. External Interface Requirements

4.1 User Interface Requirements

Describe the user interface requirements of the system.

- The system shall provide a simple document upload interface.
- The system shall display validation results clearly.
- The system shall show an error if the uploaded file type is not supported.

4.2 Software Interface Requirements

Describe software components, APIs, databases, or external services used by the system.

- The system may use a database to store user records and validation results.
- The system may use a document extraction library to read PDF and DOCX files.
- The system may use an AI validation service to analyse document content.

5. Business Rules

5.1 Rules and Constraints

Define the business rules and validation logic that the system must enforce.

- Only registered users can upload documents.
- Documents must be in a supported format (PDF or DOCX).
- Each document must match a defined template type.
- The validation score determines the acceptance status.

6. Non-Functional Requirements

6.1 Performance Requirements

- The system shall validate an uploaded document within an acceptable response time.

- The system shall handle multiple uploads without major performance issues.

6.2 Security Requirements

- The system shall allow only authorized users to access restricted features.
- Uploaded documents shall be stored securely.
- User passwords shall be encrypted or hashed.

6.3 Usability Requirements

- The system shall provide a user-friendly interface.
- The validation result shall be easy to understand.

7. Validation Rules

7.1 Required Sections

The uploaded FRD document should include the following main sections:

- Introduction
- Functional Overview
- Functional Requirements
- External Interface Requirements
- Business Rules
- Non-Functional Requirements
- Validation Rules
- Appendices

7.2 Validation Criteria

The document validation system should check:

- Whether required sections are available
- Whether section names are similar to the FRD template
- Whether sections follow the correct order
- Whether unrelated extra sections are included
- Whether the document belongs to the correct document type

7.3 Scoring Criteria

Score Range	Validation Result
75-100	Accept
50-74	Needs Improvement
0-49	Reject

8. Appendices

8.1 Appendix A: Functional Use Cases

Insert detailed use case scenarios or diagrams if available.

8.2 Appendix B: Additional Information

Include any extra information related to the system.
