

Software Test Documentation (STD) Template

Reference template for validating Software Test Documentation (STD) submissions. Replace the guidance text with project-specific content when preparing an actual STD document.

Revision History

Version	Date	Description	Author
1.0	[Date]	Initial STD template	[Name]

1. Introduction

1.1 Purpose

Describe the purpose of this Software Test Documentation document. Mention the system name and explain that this document defines the test scope, test approach, test cases, and expected testing outcomes.

1.2 Scope

Describe what parts of the system will be tested and what parts are not included in testing.

1.3 Objectives

List the main testing objectives, such as verifying functional correctness, usability, performance, security, and reliability.

1.4 Definitions, Acronyms, and Abbreviations

List important testing terms and abbreviations used in the document.

Term	Description
STD	Software Test Documentation
Test Case	A set of conditions used to verify system behavior
Defect	An issue or error found during testing

1.5 References

List related documents such as SRS, BRD, design documents, standards, or project guidelines.

1.6 Document Overview

Briefly explain the organization of the remaining sections in this document.

2. Test Plan Overview

2.1 Test Items

List the modules, features, or components that will be tested.

2.2 Features to be Tested

Identify the specific features included in the testing process.

2.3 Features Not to be Tested

Mention features that are excluded from testing and give reasons if necessary.

2.4 Test Approach

Describe the overall testing strategy, such as manual testing, automated testing, black-box testing, white-box testing, regression testing, or acceptance testing.

2.5 Test Levels

Mention the test levels used, such as unit testing, integration testing, system testing, and user acceptance testing.

2.6 Test Types

List the types of testing to be performed, such as functional testing, usability testing, performance testing, security testing, and compatibility testing.

3. Test Environment

3.1 Hardware Requirements

Describe the hardware required to perform testing.

3.2 Software Requirements

Describe the software, operating systems, browsers, tools, frameworks, and databases required for testing.

3.3 Network Requirements

Mention any network or internet requirements for testing.

3.4 Test Data Requirements

Describe the data required to execute test cases, including valid data, invalid data, and sample records.

4. Test Schedule and Responsibilities

4.1 Test Schedule

Provide the planned testing timeline and major testing milestones.

4.2 Roles and Responsibilities

Describe the responsibilities of testers, developers, project manager, and other stakeholders.

4.3 Entry Criteria

Define the conditions that must be satisfied before testing begins.

4.4 Exit Criteria

Define the conditions that must be satisfied before testing is completed.

4.5 Suspension and Resumption Criteria

Mention conditions for pausing testing and restarting testing.

5. Test Case Specification

5.1 Test Case Format

Define the format used to write test cases.

Test Case ID	Requirement ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC-01	FR-01	[Scenario]	[Steps]	[Expected]	[Actual]	Pass/Fail

5.2 Functional Test Cases

List test cases for functional requirements.

5.3 Non-Functional Test Cases

List test cases for non-functional requirements such as performance, security, usability, and reliability.

5.4 Negative Test Cases

List test cases using invalid inputs or unexpected user actions.

5.5 Regression Test Cases

List test cases used to verify that existing features still work after changes.

6. Test Execution

6.1 Test Execution Procedure

Describe the steps followed when executing test cases.

6.2 Test Execution Results

Record the actual results of executed test cases.

6.3 Defect Reporting

Describe how defects are reported, tracked, prioritized, and resolved.

6.4 Retesting

Describe how fixed defects are tested again.

6.5 Regression Testing

Describe how the system is tested after modifications to ensure existing functionality is not affected.

7. Defect Management

7.1 Defect Severity Levels

Define severity levels such as Critical, High, Medium, and Low.

7.2 Defect Priority Levels

Define priority levels used to decide how quickly defects should be fixed.

7.3 Defect Life Cycle

Describe the defect states such as New, Assigned, Fixed, Retested, Closed, and Reopened.

7.4 Defect Log

Provide a table to record identified defects.

Defect ID	Description	Severity	Priority	Reported By	Status	Remarks
DEF-01	[Defect description]	High/Medium/Low	High/Medium/Low	[Name]	Open/Closed	[Remarks]

8. Test Summary Report

8.1 Summary of Testing Activities

Summarize the testing activities completed during the testing phase.

8.2 Test Coverage Summary

Describe the percentage or level of requirement coverage achieved through testing.

8.3 Pass and Fail Summary

Summarize the number of passed, failed, blocked, and not executed test cases.

8.4 Known Issues

List unresolved issues or limitations at the end of testing.

8.5 Final Recommendation

State whether the system is ready for release, needs improvement, or requires further testing.

9. Validation Rules

9.1 Required Sections

The uploaded STD document should include the main sections listed in this template.

- Introduction
- Test Plan Overview
- Test Environment
- Test Schedule and Responsibilities
- Test Case Specification
- Test Execution

- Defect Management
- Test Summary Report
- Validation Rules
- Appendices

9.2 Validation Criteria

The document validation system should check whether required sections are available, whether section names are similar, whether sections follow the correct order, and whether the document belongs to the correct document type.

9.3 Scoring Criteria

Use a scoring method such as 75-100 Accept, 50-74 Needs Improvement, and 0-49 Reject.

Score Range	Validation Result
75-100	Accept
50-74	Needs Improvement
0-49	Reject

10. Appendices

10.1 Appendix A: Sample Test Case Table

Include sample test case formats or additional testing examples.

10.2 Appendix B: Additional Information

Include any extra information related to the testing process.
